

# Apply filters to SQL queries

## Project description

Using SQL queries I have to obtain specific information about employees, their machines, and the departments so my team can investigate potential security issues and update computers with the SQL filters AND, OR, and NOT.

## Retrieve after hours failed login attempts

My team is investigating failed login attempts after business hours and office hours end at 18:00:00. I need to identify failed login attempts after that time. The WHERE filter was used here in order to specify which columns we wanted to query.

```
MariaDB [organization]> clear
MariaDB [organization]> SELECT *
  ->
  -> FROM log_in_attempts
  ->
  -> WHERE login_time > '18:00' AND success = FALSE;
```

event_id	username	login_date	login_time	country	ip_address	success

There were 19 failed login attempts after 18:00:00

## Retrieve login attempts on specific dates

My team is investigating a suspicious security event that occurred on 2022-05-09. I need to retrieve all the login attempts for that day and the day before.

MariaDB [organization]> SELECT \*

->

-> FROM log\_in\_attempts

->

-> WHERE login\_date = '2022-05-09' OR login\_date = '2022-05-08';
